# Megha Channabasayya Vastrad

**Associate Software Engineer | Java Full Stack Developer**

Email: meghavastrad9@gmail.com |Phone: 6361442409 |Linkedin: linkedin.com/in/megha-vastrad

## PROFESSIONAL SUMMARY

Associate Software Engineer with hands-on experience contributing to Kine.ai backend microservices and tenant-facing applications. Skilled in Java, Spring Boot, Quarkus, REST APIs, GraphQL, Hibernate/JPA, SQL, React and Maven-based development. Strong foundation in object-oriented programming, API integration, data processing, alert workflows, engineering metrics, and production-oriented collaboration.

## TECHNICAL SKILLS

**Languages:** Java, SQL, JavaScript, HTML, CSS

**Backend:** Spring Boot, Spring MVC, Hibernate/JPA, JDBC, REST APIs, GraphQL,

**Frontend:** React, Material UI, Apollo Client, responsive UI development

**Databases & Tools:** MySQL, PostgreSQL, Git, GitHub, Postman, Eclipse/VS Code

**Core Strengths:** OOP, collections, exception handling, multithreading basics, debugging, API testing

## PROFESSIONAL EXPERIENCE

**Kine.ai — Associate Software Engineer** **2025 – Present**

- Contributed to Java-based microservices across alert generation, alert delivery, engineering metrics, scheduler, integrations, tenant management, tenant registration, and user management modules.
- Developed and maintained REST and GraphQL APIs, service layers, request/response models, validators, repositories, and reusable utility components using Java, Spring Boot, Quarkus, Hibernate/JPA, and Maven.
- Worked on integration services for developer productivity tools such as GitHub, GitLab, Jira, and Jenkins to support engineering activity tracking and reporting workflows.
- Built and enhanced department management features, including department creation, update flows, user-department mapping, validation logic, and API integration support.
- Implemented email digest functionality to generate and deliver scheduled summary notifications for users and teams based on engineering activity and report data.
- Supported engineering metrics and reporting workflows by contributing to backend logic for tenant-level insights, summary reports, and scheduled data processing.
- Assisted frontend development for tenant-facing screens using React, Material UI, Apollo Client, and GraphQL integration.
- Improved code quality and reliability through debugging, API validation, unit/integration test updates, and collaboration with senior engineers in an Agile development environment.

## PROJECTS

**Dating App** | Java, Spring Boot, Spring Data JPA, MySQL, REST API

- Built backend APIs and a rule-based matchmaking engine using gender, age, and interest priorities.
- Designed similarity-score logic to evaluate profiles and return prioritized top-N match suggestions efficiently.

**Agriculture Monitoring System using AI and ML** | Django, HTML, CSS, MobileNetV2

- Built a crop disease detection web application with real-time image analysis and treatment recommendation flow.
- Integrated e-commerce-oriented actions so healthy crop results could trigger sell options while unhealthy crops received treatment suggestions.

## EDUCATION

**KLE Institute of Technology, Hubli — B.E. Computer Science** **2021 –2025**

CGPA: 8.45

**J.S.S R.S. Hukkerikar, Dharwad — XII, Department of Pre-University Board** **2020 – 2021**

Percentage: 81%

**Holy Cross Convent School, Bidi — SSLC, Karnataka State Board** **2018 – 2019**

Percentage: 87%

## INTERNSHIP & CERTIFICATIONS

- **Java Full Stack Development Training** — JSpiders | 2025
  Gained practical training in Core Java, Spring Boot, Hibernate, REST APIs, SQL, and full-stack web development.
- **Cloud Application Developer Internship** — VTU in collaboration with ROOMAN Technologies, IBM, and Wadhwani Foundation.

## ACTIVITIES

- Volunteered as a coordinator for college events and participated in coding/problem-solving challenges.
- Interested in travel, culture exploration, continuous learning, and collaborative software development.
